Response to Amendment

1. Responsive to communications, dated October 13, 2004, amended claims are entered as requested.

Reasons for Allowance

2. Claims 1-26 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

The instant application relates to observing the quality of channels to be used in uplink and downlink channels where a quality parameter is measured for both link channels and is used for adaptive allocation of frequencies or channels.

The closest prior art, Cullen (US 6,339,698) and Muszynski (US 6,009,328), discloses steps of measuring proportions of the traffic and data processing element for controlling the measuring means and transmitting the selected data.

The closest prior art, alone or combined, fails to disclose the inventive steps of "defining first and second sets of trigger conditions in the uplink and downlink directions, at the mobile station, determining the state of each trigger condition and combining the states per logical function and sending the report to base station", (claims 1, 12, 13, 22 and 24).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2667
